

# Ecouter la terre

Karine BONNEVAL

Workshop, 180 mn

March 31<sup>th</sup>, from 3:00 to 6:00 pm CET

Healthy soil is noisy. Because we humans stand on it, we are often unaware of what is really happening under our feet. Listening to the Soil is an art and science project that brings together different actors in society, unfolding in the form of collaborations in France and abroad, and bringing together singular branches of science.
